

GANTRIX

Procurement follow-up for small industrial firms.

Seed round - September 2026

Lena Vartan, CEO - Marc Delorme, CTO - Sofia Reyes, Head of Sales
contact: fictional@example.com

The customer

Purchasing managers in industrial SMEs (50 to 200 employees). The plant director signs the subscription.

From a customer, Ferrolux SAS, April 2026: "We stopped chasing suppliers on Fridays. The tool does it."

What changed since pre-seed

In January 2026 we dropped the manual service and shipped the email parsing engine.

We abandoned the per-user pricing tested in Q4 2025: buyers wanted one price per site.

The product

Gantrix reads supplier emails and updates the order status automatically. Live since February 2026.

Traction

42 paying customers as of August 2026, first payment in November 2025.

MRR: 8,200 EUR in June 2026, 9,900 EUR in July 2026, 12,100 EUR in August 2026.

Named customers: Ferrolux SAS, Metalpro Ouest, Bricard Fonderie, Atelier Vion.

Retention

Monthly logo churn: 2.1% on average over the last six months.

Week-8 retention of the February cohort: 84%, flat since week 6.

Customers lost since launch: 4, three of them plants that closed their purchasing desk.

Economics

Price: 150 EUR per month per site, paid by 42 customers.

Customer acquisition cost: 900 EUR, computed on the 18 customers signed in Q2 2026 (sales salary plus events).

Gross margin per customer: 81%.

Sales cycle: 34 days on average from first call to first payment.

Acquisition

Channels: 55% outbound by our sales lead, 30% referrals from existing customers, 15% trade shows.

Market

Bottom-up: 24,000 industrial SMEs in France with a purchasing desk, times 150 EUR per month, is 43 million EUR per year.

Competitors: Procurio (stronger ERP integrations) and Suppli (cheaper, no email parsing).

Why now: since 2025 the EU e-invoicing mandate forces suppliers to send structured documents.

Team

Lena Vartan, CEO. 8 years as purchasing manager at Forgeval Industries, led a team of 6 buyers.

Marc Delorme, CTO. 6 years at Datadog as a staff engineer.

Sofia Reyes, Head of Sales, hired March 2026. Previously 5 years at Suppli.

Both founders full-time since January 2026. Equity: Lena 45%, Marc 45%, option pool 10%.

Missing for series A: a VP Marketing. Hiring planned for Q1 2027.

The ask

We are raising 1,500,000 EUR in this seed round.

Use of funds: 50% sales team, 30% product, 20% operations.

Next milestones

Goal before series A: 150 paying customers and 45,000 EUR MRR by September 2027.

Monthly burn: 70,000 EUR. Runway with this round: 21 months.

Who already invested

Pre-seed, January 2026: 400,000 EUR from Lyon Angels and two business angels. Lyon Angels follows on in this round.
